RE: Notification of Aqueous Effluent Release on February 3, 2009, BASF
Hannibal, Missouri, EPA ID# MOD050226075

Dear Mr. Gardner:

The Missouri Department of Natural Resources' Hazardous Waste Program and the U.S. Environmental Protection Agency (EPA) received a notification of a release on February 3, 2009, via e-mail. The DNR and EPA are requesting BASF submit a comprehensive report outlining the following details:

1. Date, time, and location of release;
2. BASF personnel that responded to the situation;
3. Constituents related to the aqueous solution and estimated amounts, not to be limited to hazardous constituents;
4. Measures taken to limit the spread of the release;
5. Activities completed to remove all contamination related to the release;
6. A map indicating the location of the release with respect to the BASF plant; and
7. Any information that will aid in documentation of the release and response activities to ensure the situation was properly handled and future work in the area will be conducted with adequate knowledge.

If you have any questions regarding this letter, please contact me at the Missouri Department of Natural Resources, HWP, P.O. Box 176, Jefferson City, MO 65102-0176, or by phone at 573-751-3553, or Ms. Patricia Murrow, EPA, at (913) 551-7627.

Sincerely,

HAZARDOUS WASTE PROGRAM
